

E learning at its best . . .

. . . we are the digital experts

What they wanted

A world class online learning portal for staff.

What we did

Precision Digital originated and built an e-learning platform pharmacy for staff. The Omega portal provides online learning and assessments to enable pharmacy staff to complete their continuous professional development. We built a web based platform that works across all devices. We were delighted that our portal recently won 8 awards at The SMART Awards.
